PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with internship experience building intelligent systems and data-driven applications. Published IEEE researcher with two peer-reviewed papers spanning Generative AI and multilingual NLP, applying techniques such as Stable Diffusion, LoRA, DreamBooth, ASR, and speech synthesis in real-world deployments. Proficient in Python, Machine Learning, Generative AI, and Data Visualization, with solid software engineering fundamentals across Git workflows, REST APIs, and database management.

EXPERIENCE

AI & ML Automation Intern — Nvisust Innovations Pvt. Ltd.

Dec 2025 - Apr 2026

- Developed an interactive voice chatbot using speech processing, LLMs, and conversational AI technologies.
- Built Python-based backend modules and automation workflows for AI-driven applications.
- Debugged and resolved latency issues in LLM inference pipelines through profiling and prompt optimisation.

EDUCATION

B.Tech - Artificial Intelligence and Data Science — Muthoot Institute of Technology and Science (APJKTU)

2022 - 2026

CGPA: 7.98

Higher Secondary Education — GHSS Vayala

2020 - 2022

Score: 94.03%

Secondary Education — St. John's School Anchal

2019 - 2020

Score: 87%

TECHNICAL SKILLS

Programming: Python, Java, SQL, C, R

AI Machine Learning: Scikit-learn, TensorFlow, PyTorch, NLP, LLMs, RAG, LangChain, FAISS, Hugging Face

Data Analytics: Pandas, NumPy, EDA, ETL, Power BI, Tableau, Matplotlib

Backend Databases: FastAPI, REST APIs, MySQL, PostgreSQL, SQLite

Tools Engineering: Git, GitHub, Docker, Linux, SDLC, OOP, Unit Testing

Soft Skills: Analytical Thinking, Communication, Presentation Skills, Problem Solving, Team Collaboration

PROJECTS

Tiny SQL Expert [Python, FastAPI, SQLite, Qwen2-1.5B]

- Built an NLP-to-SQL system converting natural language questions into safe SQL queries using Qwen2-1.5B.
- Implemented prompt engineering, rule-based keyword extraction, and self-correction mechanisms for improved accuracy.
- Used SQLite EXPLAIN QUERY PLAN and blocked dangerous SQL commands for secure, CPU-efficient query execution.

EduMate - AI Summarisation Assistant & Quiz [Streamlit, Gemini API, gTTS, Python]

- Developed an AI-powered study assistant using Gemini 1.5 Flash with PDF extraction and intelligent chunking.
- Built flashcard generation and interactive quizzes with real-time feedback and voice-enabled learning via gTTS.
- Emphasised modular architecture, testable components, and scalable design patterns.

PUBLICATIONS

EVA: AI-Driven Avatar for College Event Promotion

IEEE ICSCC 2025 - Published in IEEE Xplore

- Developed AI-powered content generation using Stable Diffusion and LLM-based prompt refinement.
- Applied DreamBooth and LoRA fine-tuning for institution-specific content creation, achieving 90% accuracy in content relevance.

VOSK: Voice-Assisted Multilingual Smart Kiosk System

IEEE ICITIIT 2026 - Published in IEEE Xplore

- Built a real-time multilingual kiosk (English, Hindi, Malayalam) integrating Whisper, IndicASR, SentenceTransformer, IndicTTS, and HiFi-GAN.
- Achieved 95% accuracy in language detection, speech synthesis, and real-time voice interaction.

CERTIFICATIONS

- Google Cloud Computing Foundations** - Google Cloud
- Python for Data Science (Elite)** - IIT Kharagpur, NPTEL
- Introduction to Machine Learning (Elite)** - IIT Madras, NPTEL
- Data Analytics with Python (Elite)** - IIT Roorkee, NPTEL
- Web Development with Django** - ZeroPixels
